

Compton PC Traffic Committee Report for Meeting on 19 September 2018

1. **Down Lane**
SCC have confirmed that they have no budget for any improvements in the current financial year.

2. **AQMA - Traffic Pollution**
 - 2.1 GBC have until mid-2019 to come up with an action plan to reduce the level of pollution in the Air Quality Management Area on the Street.
 - 2.2 They have commissioned various additional traffic studies in the AQMA but have not released any information as yet.
 - 2.3 I reported that the NO2 readings in the AQMA for May (which was while the bridge was shut) were higher than both January and April. This is extraordinary and there is no explanation for this. The June figures are eagerly awaited but they have not yet appeared on the website.
 - 2.4 GBC, their new consultant and SCC are holding regular meetings and GBC will be providing an interim report to those affected in the AQMA. However, this is unlikely to provide us with any clearer information.
 - 2.5 GBC have confirmed that “all solutions are still on the table” and this includes Average Speed Cameras.
